IONIC WEALTH BY ANGELONE | **Product Designer** Dec'24 - Present

Conceptualised the design of **Portfolio Gap Analyser**, an **AI-powered conversational chat flow** within the app translating complex portfolio analysis into an interactive, **personalised experience that guided users toward actionable investment decisions**

Redesigned the **Onboarding Journey** (Client App + RM App Web + RM App Mob), giving users control over their profile inputs post-signup and **reducing friction at the activation stage**

Owned end-to-end design of the **Accredited Investor qualification flow** (Client App + RM App Web), streamlining a high-stakes compliance journey into a smooth, **guided experience for HNI users**

Designed **Global Search**, enabling users to find investments, features, and content across the app from a single entry point

Built the **Design System from scratch** — foundations, tokens, and variables. And led a **subsequent Design System Revamp** when AI-assisted development began creating significant component duplicity and visual inconsistency; worked closely with dev to **resolve deep-rooted color discrepancies in existing code, aligning implementation with design tokens** and establishing a single source of truth across 2 product surfaces and 3 designers

Delivered the **Ionic Website** end-to-end within 2 months, spanning the landing page, compliance pages, and all supporting sections, **coordinating inputs from multiple stakeholders across the organisation**; the landing section went through multiple iterations as aligning varied stakeholder visions into a single cohesive visual and storytelling direction was a major design challenge

Crafted the **Choose Your Co-Founder flow & webpage** across the Client App and main website, one of the company's biggest campaigns and navigated competing briefs from product and marketing teams to arrive at two entirely separate pages, **Portfolio Assessment & Portfolio Streamliner**, and the **SIF webpage**, each designed across mob, tab, and web to serve its own distinct narrative

Templatized the SEO Pages layout across 40 distinct pages and **defined a visual brand identity** to be followed across all web touchpoints — bringing cohesiveness to a surface that had none, at a time when the entire app was simultaneously undergoing an agentic revamp with a new visual identity; the system and direction were **recognised and appreciated by stakeholders**

Collaborated on exploring the app **Rethinking App UX** project to come up with a more agentic app UX with an entirely new design language

Designed on **Angelone x Ionic & Jupiter x Ionic integration** design work, translating each brand's visual identity into cohesive co-branded experiences while maintaining Ionic's design language

work experience

FLOBIZ | Product Designer II

Jan'23 - Jan'24

Spearheaded the **complete Web App Redesign**, resulting in a **7% boost in user activation**, **15% higher click-through rates** on "create" buttons, and **25% more feature discovery**.

Pioneered the design of an **AI-based Bill & Item Import System** **Boosting user activation by 12%**, with more users generating **3 invoices within the first 5 days** of registration

Redesigned the **Bulk Upload feature** with a Google Sheets-style interface, **increasing bulk imports by 14%**

Developed **GST compliance features**, including e-invoice and e-way bill generation for Android/iOS apps, **adopted by 5,000+** businesses, resulting in enterprise plan **revenue boost by 10%**

GOLDSETU | Associate Product Designer

Sep'21- Dec'22

Acquired **complete ownership** of the **customer facing PWA** pivotal for jewellers. This encompassed the design and implementation of **Landing Page** & other features like **Orders Flow, Saving Plans, and Digital Gold**

Collaborated on designing the **Marketing Website** for Goldsetu with a senior designer

Produced the product's explanatory videos for company's Youtube channel

GALLERY 5 | UI/UX Designer

Aug'20- Sep'21

Led the **Redesign of the Brands & Influencers platform** to boost user engagement and consistency. Streamlining **campaign management tasks** like **tracking influencer metrics, budgeting, payments, and deliverable finalisation**.

Worked on a **micro app for HRX** (a client) to **track fitness goals** for a campaign.

Served with multitude of design horizons like **social media posts, email marketing templates, presentation slides for business pitch, packaging design for Myntra's EORS campaign, image & video editing for influencer's deliverables**.
